

# LA LLOVIZNA

2023

**TIPO+DEPs**

**VIERNES 1º SEPTIEMBRE**

## Viernes 1 de septiembre de 2023

Almuerzo 12.30 hs. (con invitación)

Remate 14.00 hs. Presencial y por  [SVBREMATENET](https://svbrematenet.com)

*Streaming*

**140 Toros Negros y Colorados**

**300 Vaquillonas Negras y Coloradas**

Todos los animales se venden con análisis negativo de Paratuberculosis

20 Toros de Puro Pedigree y 120 Toros Puro Controlado

15 Vaquillonas de Puro Pedigree

Parición Septiembre/Octubre 2023

TODOS LOS ANIMALES (PP Y PC)

CON DEPs PARA CRECIMIENTO,

FERTILIDAD Y CALIDAD CARNICERA

Establecimiento oficialmente libre de Brucelosis y Tuberculosis

La Llovizna julio 2023

Amigos criadores:

Sin darnos cuenta fuimos sumando años y hoy los estamos invitando al remate N°20 de La Llovizna.

Mucho camino hemos andado poniendo siempre al frente la idea y el compromiso de ofrecerles animales con buen fenotipo y datos, Tipo + DEPs, adaptados a las condiciones pastoriles donde van a trabajar. Nos planteamos un trabajo basado en el rigor total para tomar las medidas de los reproductores que no solo les ofrecemos sino que también usamos, cada dato de DEP que ustedes leen tiene atrás el trabajo de muchas personas comprometidas con la excelencia. Que ustedes confíen en nuestro trabajo es el mayor logro que alcanzamos.

Este año incorporamos en algunos toros de pedigree DEPs clásicos de Consumo Residual (RFI) y de consumo de Materia Seca. Angus está trabajando muy fuerte en lograr una población de referencia para poder obtener, en un futuro no muy lejano, DEPs genómicos de esta característica tan importante para nuestro negocio. Desde La Llovizna acompañamos este gran trabajo enviando nuestros toros a las evaluaciones.

El 60% de los toros son aptos para entorar vaquillonas con muy buen crecimiento posterior y sumamente carniceros, criados a pasto y listos para entrar a trabajar. Las vaquillonas PC están pariendo con 3 años, ya criadas y también listas para entrar a sus rodeos sin tener que hacer grandes esfuerzos nutricionales para que terminen su desarrollo, ya lo hicimos nosotros. El conjunto de vaquillonas y toros que les ofrecemos este año es excepcional.

Los invitamos a revisar los animales en el campo. Vengan, los recibiremos personalmente y con mucho gusto. Son realmente bienvenidos.

El primero de Septiembre los esperamos en la Sociedad Rural de Cañuelas, a celebrar juntos todos estos años de trabajo.

Nuevamente queremos agradecerles que sigan confiando en lo que hacemos, a nuestro personal que trabaja con total dedicación y compromiso, o todo el equipo de Saenz Valiente Bullrich y a nuestras familias que son la razón de ser de esta vida.

Y como siempre el recuerdo y agradecimiento permanente a nuestros queridos viejos Mario y Dolly, ellos abrieron la huella por la que transitamos...

Alfonso y familia

Pablo y familia

## Interpretación de la información (Tanto para Pedigree como para Puro Controlado)

En el resumen de padres los criadores pueden encontrar las tablas de percentiles. Estas nos indican en que posición relativa se ubica el toro seleccionado dentro de la población.

Por ejemplo, cuando se busca un toro para usar en vaquillonas, seguramente se elegirá el que tenga un DEP negativo para peso al nacer. Con la tabla de percentiles se puede ser más preciso: seleccionar aquel que no sólo sea negativo, sino que se ubique, por ejemplo, dentro del 30% de los más negativos.

Iconos para  
vaquillonas

Toros que por su bajo DEP al nacer pueden ser utilizados para entorar vaquillonas de 15 meses.

Toros que por su bajo DEP al nacer pueden ser utilizados para entorar vaquillonas de 20 meses.

## AngusGS

Los animales de pedigree cuentan con INFORMACION GENOMICA PROPIA, esta información le da a los datos de DEPs una mayor precisión, es como si el animal ya tuviese crías evaluadas aportándole datos cuando todavía es virgen. Por lo tanto la posibilidad de que los valores de

DEP varíen cuando los reproductores comiencen a tener crías es mucho menor. Es un avance tecnológico muy importante que nos orgullecemos de ofrecerles, procurando de esta forma mantenernos a la vanguardia para que nuestros clientes tengan mayores certezas a la hora de incorporar genética en sus rodeos.

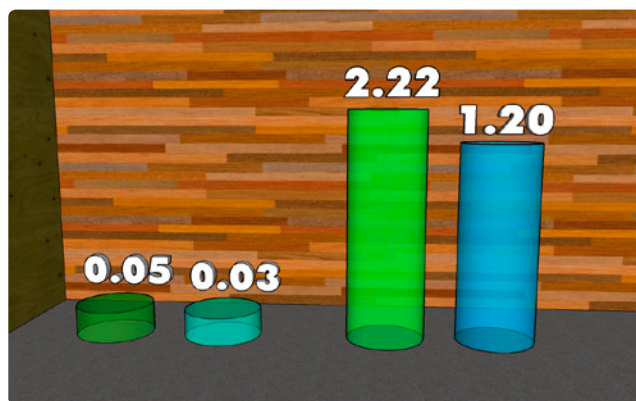

## Novedad

### DEPs clásicos para Consumo Residual (RFI) y consumo de materia seca (CMS).

De fundamental importancia para nuestro negocio ya que expresan la eficiencia de los animales en la conversión de alimento en carne. Cuánto más negativo el DEP mejor es el reproductor para esa característica (consume menos alimento para la misma ganancia diaria medida)

## Toros Puro Controlado

30% superior de la raza  
Entre el 50% y el 30%

A causa de la sequía, algunos toros debieron ser recriados en La Pampa, por eso no tienen DEPs luego del Destete.

El cuadro superior es el fiel reflejo de un trabajo realizado con seriedad utilizando esta magnífica herramienta. En La Llovizna nos propusimos mantener acotado el peso al nacer de nuestros animales y aumentar destete y final con un tamaño moderado y buenas características carniceras.

Como pueden ver el promedio nuestras vaquillonas nacidas en el año 2020 están en la media para peso al nacer y en el 35% superior para destete y 15% final con una altura en la media de la raza. En cuanto a las características carniceras estamos mejorando el área de ojo de bife (ubicándonos en 30% superior de la raza) con buena grasa de cobertura.

**100 VAQUILLONAS PREÑADAS A LOS 24 MESES  
PARICIÓN SEPTIEMBRE/OCTUBRE**

**LAS VAQUILLONAS SE VENDEN CON DEPs PARA TODAS LAS CARACTERISTICAS  
QUE ESTARAN DISPONIBLES EN LOS CARTELES DE LOS CORRALES DE VENTA**
